- Ability to **communicate ideas**.
- Good with **teamwork** and solo work.
- **Hard working.**
- Pursuit of **excellence**.
- Basic knowledge of the **Back-End** technologies**.**
- Reliable.

EXPERIENCE

2021 – NOW
INCORPORATED FREELANCE DEVELOPER, 9423-7518 QUEBEC INC.
I incorporated myself as a freelancer developer. The projects I have worked on so far use the following technologies: JavaScript, React, Next.js, Node.js and Google Cloud Firebase, HTML and CSS. I am still actively working as a freelancer.

2019 – NOW
CREATOR OF FINANCE D - ACCOUNTING SOFTWARE, FINANCE D
I designed, programmed and distributed an accounting software for Windows and Mac. It's a great demonstration of my ability to manage a complete project and ensure its quality. I developed it with JavaScript, HTML, CSS, and the Electron.js Framework (used by Microsoft Teams and Facebook Messenger, for example). I also created a website and documentation for this software. I am particularly proud of it and have received several positive comments from users. More details on the website: finance-d.com

2017 – NOW
BOOKKEEPING AND IT, GESTION DESROCHES INC.
I am responsible for the bookkeeping of about fifty clients at Gestion Desroches. I master among others: Sage 50, Excel, Google Drive, Google Sheets and a programming language called Autohotkey. I created several internal tools with Autohotkey to automate repetitive data entry tasks in Sage 50. This experience also motivated me to create the Finance D software to meet the needs of our customers who do not have a good accounting system.

2012 – 2015
PEST PREVENTION SERVICE SPECIALIST, STERITECH

I had a route of monthly clients for whom I provided pest prevention services in Montreal and the surrounding area. This job was a very good management experience to be able to deal with schedules, professionalism and customer satisfaction.

EDUCATION

2018-NOW
CONTINUOUS ONLINE TRAINING, UDEMY, STACKOVERFLOW, MDN

To start programming on a good basis, I took several specialized courses on programming topics. For example: JavaScript, HTML, CSS, Node.js, Electron.js, React.js, Next.js, etc. See Udemy.com. I still actively train myself and learn about new technologies by experimenting with them. I like learning new techs. Recently I started learning the Go language.

2013-2017
BACHELOR'S DEGREE IN THELOGY, UNIVERSITY OF LAVAL

I graduated from a bachelor's degree with an honorable mention.

2017
INTRO TO ACCOUNTING, CEGEP OF ST-HYACINTHE

Required training for my bookkeeping job at Gestion Desroches Inc..

2008-2009
SOUND ENGINEERING, CEGEP OF DRUMMONDVILLE

Graduated from a sound engineering and studio recording certificate (post high school).

2008
HIGH SCHOOL GRADUATE, ST-HYACINTHE

Regular High-School in Quebec, Canada.

SPOKEN AND WRITTEN LANGUAGES

- French (native language)
- English (bilingual)

VOLUNTEERING

- Free software development to help Quebec taxpayers (refer to finance-d.com).
- 10+ years volunteer soundman for a Christian church.
- Food distribution in Montreal with the organisation named « Un cœur pour les autres ».
- 10+ years donor for World Vison.

WHY ME?

I am a reliable, hard working and excellence seeking professional that loves his job. I believe I can be a great asset and teammate. My skills are constantly evolving as time goes on and I am open to learning new skills as needed.
